

GENERAL INFORMATION:

English name: cis-butenedioic anhydridecis-butenedioic anhydride

UN Number: 2215

Hazard category: Section 8.1, Acidic corrosion products.

Main use: is an important organic chemical raw materials, used in the manufacture of polymers, copolymers, but also for synthetic resins, coatings, pesticides, pharmaceuticals, food and lubricants additives.

TECHNICAL DATES:

Item	Index
Appearance	White, yellowish lump or flaky crystals
Purity(As C ₄ H ₂ O ₃) ω/% ≥	99.7
Melting color/Hazen (Platinum - cobalt color number) ≤	25
Crystallization point /°C ≥	52.5
Residual mass of ignition residue /% ≤	0.005
Fe contentω (μg/g) ≤	2
